ABRAHAM ADDAI YEBOAH

Flutter Developer

Kumasi, Ghana (open to remote) | +233 24 848 4786 | addaiabraham76@gmail.com
GitHub: github.com/NanaAbram

PROFESSIONAL SUMMARY

Flutter developer with a Flutter internship at Amalitech and remote software engineering experience at citiFoods. Builds Flutter apps with Provider, Firebase and REST APIs, and has three apps deployed live. Final-year BSc Computer Science student at UENR and AWS Certified Cloud Practitioner. Looking for a remote full-time or part-time Flutter role.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Provider (state management), REST API integration
Backend and cloud: Firebase (Auth, Firestore, Cloud Messaging), Supabase, Node.js and Express, AWS (Cloud Practitioner)
Languages: Dart, JavaScript, Python
Tools: Git, GitHub, Paystack integration, TensorFlow.js

PROJECTS

QuickPlate — Flutter, Provider, Firebase, Node.js REST API

- Food-delivery app: browse and search restaurants, build a cart and check out with a delivery pin on a map.
- Manages app state with Provider. Orders go through a Node/Express REST API, and order status updates live from Firestore with push notifications (FCM).

CampusPrint — Flutter Web, Supabase, Paystack

Live: campusprint-ng.web.app

- Connects students with campus print shops for cashless print orders.
- Built student and print-shop dashboards, order tracking and Paystack payment integration.

UENR Flora: AI plant identification (final-year project) — Flutter Web, Supabase, TensorFlow.js

Live: uenr-flora.web.app

- Identifies 76 plant species from an image and runs a separate healthy/unhealthy check, using a two-headed MobileNetV2 model.
- Reported results from the thesis: 87.69% top-1 species accuracy and 93.29% health-check accuracy, trained on 9,044 images.

HostelHub — Flutter, Firebase

Live: flutter-complete-app-d3215.web.app

- Online hostel booking app that lets students find and book hostels near campus, built with Flutter and Firebase.

EXPERIENCE

Flutter Mobile Development Intern — 2025 (3 months)
Amalitech, Kumasi, Ghana

- Assisted in developing cross-platform mobile applications using Flutter.
- Worked with senior developers on UI/UX implementation and feature integration.
- Took part in code reviews and agile processes, and used Git for collaborative development.

Software Engineer (Remote) — 2023 – 2024
citiFoods, Sweden

- Developed and maintained web and mobile applications using modern development frameworks.
- Collaborated with cross-functional teams to design, implement and deploy application features.

Field Trainer — 2020 – 2024
Ecom Ghana, Akrokerti, Obuasi District

- Led a team of junior trainers and coordinated training sessions to improve field staff performance.
- Implemented technology-assisted data collection processes.

EDUCATION AND CERTIFICATION

BSc Computer Science — Final year
University of Energy and Natural Resources (UENR), Ghana

AWS Certified Cloud Practitioner — May 2026
Amazon Web Services
